

Q3 Regional Operations Report

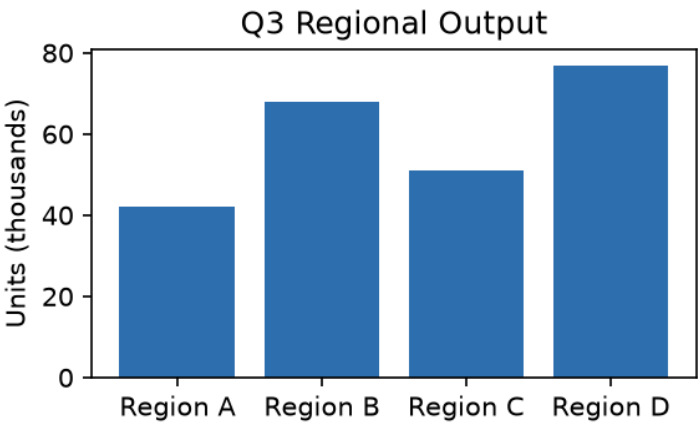

This report summarizes regional operational output for the third quarter. Overall throughput increased across three of the four monitored regions, driven primarily by expanded shift coverage and reduced equipment downtime.

Region B continues to lead in total output, while Region A shows the largest quarter-over-quarter improvement. Details for each region are provided in the table below.

Table 1. Output by region, in thousands of units.

Region	Q2	Q3	Change
Region A	31	42	+35%
Region B	60	68	+13%
Region C	55	51	-7%
Region D	70	77	+10%

Efficiency = Output / (Hours x Headcount)

Eq. 1. Efficiency ratio used for regional comparison.
